Clutch Protection System

The clutch protection system prevents excessive use of inching as well as minimizes change-impact.

Boosting type brake valve (OPT)

The boosting type brake valve is applied for strong braking performance.

Highly durable drive axle

The strengthened drive axle separable from transmission ensures low vibration and easy maintenance. The wet disc type brake is applied for easy operation, smooth response and maintenance free.

Fully hydrostatic power steering

The hydraulic steering system always guarantees smooth and flexible steering, preventing over-run and kick-back.

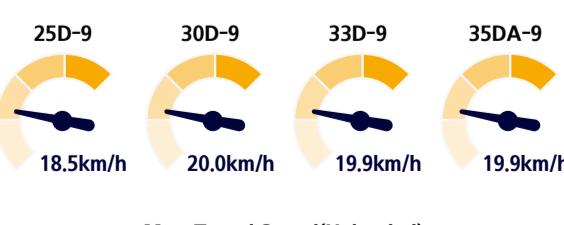

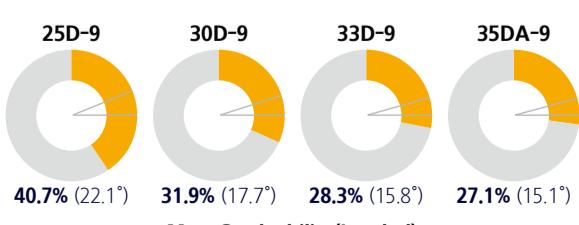

Oil cooled disc brake

The wet brakes with excellent braking power and durability offer a stable and reliable braking power. Also, an oil cooler has been added to improve durability in working environments where the frequency of brake operation is high.

Faster Travel Speed & Gradeability

The powerful high-output engine provides greater acceleration, better gradeability and faster travel speed on any tough terrain or slope.

Easy & Comfort

Best Convenience & Optimized Ergonomics

Powerful engine and high technology systems provide you with enhanced performance and high productivity.

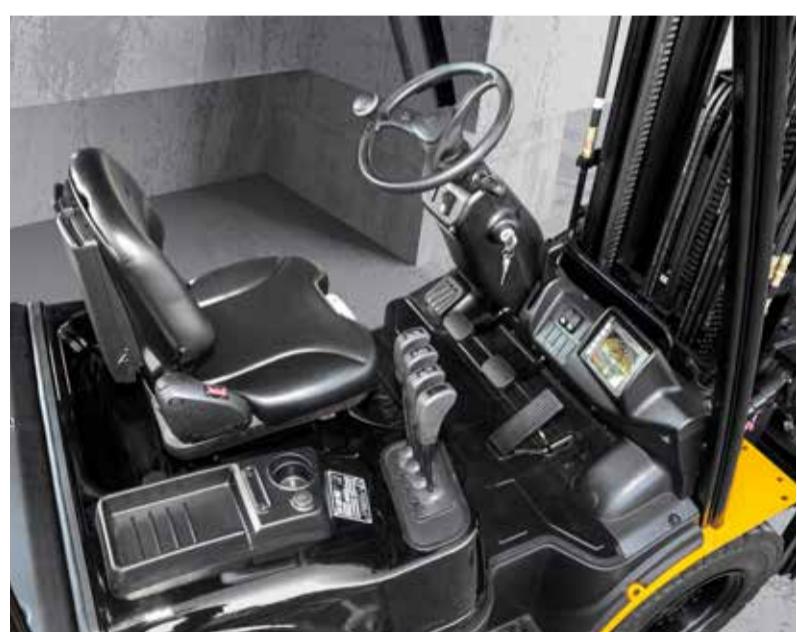

Some of the photos may include optional equipment.

Spacious Operator Cabin

The newly designed cabin provides wide visibility and spacious environment, ensuring all day comfort for the operator.

Grammer Seat (STD)

Easily adjustable suspension seat, based on a human engineering design, reduces operator fatigue and provides greater comfort.

- ELR(Emergency Locking Retractor) type seat belt as a standard
- Heating(STD) and head rest(OPT)

Rear Horn (OPT)

Allowing operators hand to remain within forklift at all times for safety. An integral horn switch can prevent any hazardous situation at reverse mode.

Adjustable steering Wheel

To achieve a comfortable drive position, the angle of the steering column can easily be adjusted by a lever on the right-hand side of the steering column.

Low entrance height

The low entrance height ensures easy and safe access for the operator.

Advanced LCD Monitor

The 5.6 inch wide screen LCD color monitor allows the operator to control the machine with ease. The monitor features speed, travel direction, battery discharge indicator and hour meter.

Main monitoring features

- Hour-meter
- Fuel level gauge(Warning-Red)
- Signal / Warning light
- Gear (F / N / R)
- Speedometer
- Mast tilting degree(Alarm-Red)
- Clock
- Engine temperature gauge(Warning-Red)
- Odometer

① Load Indicator (OPT)

The optional load indicator displays the load weight on the monitor. The load sensor reduces the time to check loaded weight and the alarm alerts the driver when overloaded.

③ Machine inclination indication

The grade (left) and slope (right) sensors are built into the MCU and provide the grade and slope status information of the vehicle connected with the road surface condition in real time.

② Auto Fork Leveling System (OPT)

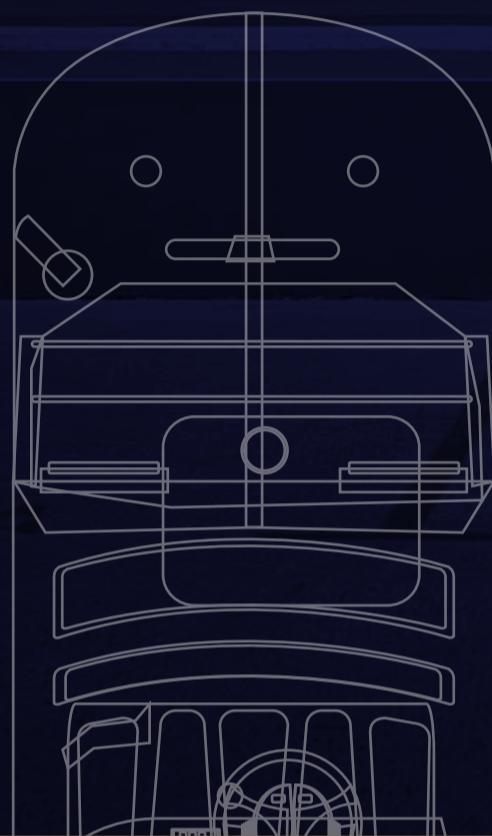

To improve the productivity the auto fork leveling system will automatically stop the tilt movement when the mast is in a straight position.

Secure & Safety

Advanced Safety

The safely designed driver's space makes your operating more comfortable.

Some of the photos may include optional equipment.

Excellent visibility for safe operation

Optimized lift cylinder arrangement provides operator with wider visibility. The panoramic mirror expands the driver's view when backing up.

Safety Lamps & Rear Reflectors

Halogen headlights and rear LED combination lights offer the driver visibility in all circumstances. Rear reflectors mounted on the counterweight enhance safety for the driver and the application.

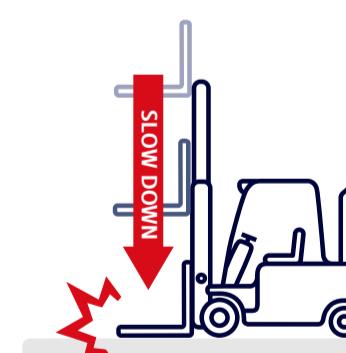

Various Safety System

The adoption of a high-sensitivity sensor and advanced safety system eliminates the risk of safety accidents.

Hill Start Assist Control (HAC)

Anti Roll-back system offers protection against the machine rolling back on a ramp in combination with exceptional ramp start capabilities.

Fork Safety Features

The down-safety valve prevents forks from dropping down in case of sudden damage of hydraulic line.

Operator Presence Sensing System

All mast and drive movements stop functioning when the operator is not in the seat.

Strong overhead guard

Exceeding CEE and ANSI regulations, the overhead guard offers optimal protection combined with excellent all round visibility.

Auto parking brake

If the operator leaves the seat while the gear lever is in neutral, the parking brake is automatically engaged to secure safety, and released upon the operator's return to the seat.

Maintenance & Convenience

Fast and Easy Maintenance

An ideal arrangement of components ensures easy access and convenience for maintenance.

Some of the photos may include optional equipment.

Large Engine Hood

Highly accessible engine compartment assures fast and efficient maintenance. The enlarged air cleaner(7") has extended service time of engine.

Waterproof & Dustproof cover

Newly developed Waterproof and Dustproof fuse box and relay box for ease of maintenance.

Rear tire & Under cover (OPT)

The rear tire cover and under cover with PE material protect the engine, radiator, and components from dusts caused by ground. Also, these options can be selected separately.

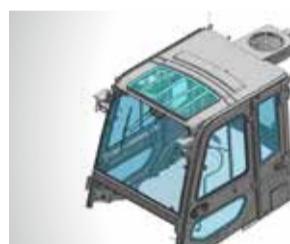

Rear view camera (OPT)

The rear view camera and monitor connected with the reverse switch guarantee a safe working environment.

Parking brake switch (STD) & Emergency switch (OPT)
